Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 drawn to a method of making intron-less cDNA using plant DNA, classified in class 435, subclass 468.
- II. Claims 9-19, drawn to a method of producing a plant gene, classified in class 435, subclass 419.

The inventions are distinct, each from the other because of the following reasons:

1. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions use different reagents, have different steps and produce different results.
2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
4. Applicant's CRF has been entered.
5. Applicant is reminded of the need to file a substitute Oath.
